Water Line Break in Kempner

Kempner Water Supply Corporation (KWSC) experienced a main water line rupture yesterday afternoon in a concrete line on HWY 190. This has affected the source for the water for the City of Lampasas. In response, the City of Lampasas has implemented stage 5 water restrictions. According to the City of Lampasas this means that *all outdoor and non-essential use of water is strictly prohibited.*

As of this morning, City Manager Finley de Graffenried shared that KWSC is continuing to excavate the site, and is bringing more and larger equipment in to be able to excavate more quickly. The

line is 15-17 feet deep and is a 21 or 24 inch main line. Mr. de Graffenried stressed that this is KWSC's repair, not the City of Lampasas's repair. Our utility employees are on site assisting and helping if needed. (Speculation is that the extreme heat may have caused subsurface movement.)

Most recently, Lampasas Radio was advised by the City of Lampasas employees that the leak has been found and that water will be cut off to the Lampasas water towers most likely this afternoon or evening. It is not known for how long, but it is estimated that repairs should be complete within 24 hours. It is our understanding that the repair crew will be dispatched from the Dallas/Ft. Worth area.

At this time the city is staying the course with stage 5 water restrictions; The message from city leaders: NOW IS THE TIME TO START CONSERVING WATER IN A BIG WAY!!!

The City of Lampasas has been as transparent as possible, given the rapid changes in the situation. Updates are being posted at the City website, lampasas.org. The City Manager shared that the city appreciates everyone being diligent about conserving water and appreciates the efforts of our community.
